

mHealth: Mega Electronics lands FDA win for smartphone ECG monitor

Mass Device

Finland-based Mega Electronics wins FDA clearance for its eMotion Android smartphone-based continuous heart rhythm monitor.

Finnish medical device maker Mega Electronics won FDA approval for its eMotion continuous ECG monitor, designed to work with Android-based smartphones.

The system provides real-time remote heart rhythm monitoring that collects data and provides caregivers with alarms when abnormal heart rhythms are detected. The device is comprised of wireless electrodes that communicate via Bluetooth with a smartphone app.
