

SciFri 101411 Hour 1: Nanostructure Crystals, Toaster Project, Space Experiments, Eggs In Space

Submitted by Guest (not verified) on Sun, 10/16/2011 - 8:46pm

Chad Mirkin describes using DNA molecules to shape nanoscale crystal structures, Toaster Project author Thomas Thwaites discusses his quest to build a toaster from scratch, and a student competition seeks space experiments. Plus - eggs in space!
