

Cameras

Sony Block Cameras are designed for security, inspection, and monitoring applications as well as for integration into OEM systems. The compact cameras measure 50 mm x 57.5 mm x 88.5 mm and weigh 230g. Their 18X optical zoom lenses make them useful for applications that require high magnifications or wide fields of view. In addition, the cameras are capable of 12X digital zoom. Other features include privacy zone masking, auto exposure control, and auto focus optics.
