

www.dekkomedical.com

Dekko Medical Devices is a full-service contract manufacturer serving the medical device, diagnostic, and biotech industries.

Through the Dekko Technical Center, we offer accredited A2LA Laboratory services such as Fourier Transform Infrared Spectrometry, Inductively Coupled Plasma Emission Spectrometry, Gas Chromatography, High Performance Liquid Chromatography, Gel Permeation Chromatography, Differential Scanning Chromatography, Thermogravimetric Analysis, Infrared Thermal Imaging, Good vs. Bad material comparison, Deformulation, Failure Analysis, Environmental Simulation, Metrology, as well as tensile properties, (tensile, elongation, modulus), flexural properties (stress, strain, modulus), Capillary Rheometry, and impact (Izod, Charpy).

Certified UL Test Agency services include complete start to finish testing, evaluation, and approval coordination.

We provide clean room assembly and manufacturing as well as product design and development from concept to final packaging, with a strong and flexible approach to program management. Our injection molding capabilities range from 30 to 1,200 tons, and specialties include insert, overmolding, and insert-molded heating elements. In addition, we manufacture medical heating wire, custom connectors and cords, and plastic profile extrusions. We provide rapid response for prototype and pre-production requirements in virtually all of our processes. Our facility is FDA registered and ISO 9001 certified. For more information, contact Lee Jones at (603) 673-9737 or lee.jones@dekkomedical.com.
