

www.smcltd.com

SMC Ltd. offers complete Contract Manufacturing, from design to manufacturing and support, for the medical industry. SMC's certified and registered multi-facility organization provides complete turnkey assembly. From product testing into growing production levels, strong financial resources enable response to rapid product demand.

Class 10,000 cleanroom molding and assembly reduces time and cost while increasing throughput. Precision facility-wide environmental controls and systems contribute to precise repeatability and verified quality. Integrated quality systems manage lot control, certifications, and record retention. Every project detail is monitored, controlled and captured through SMC's inclusive management system.
