## 1/4 VGA Displays

These 1/4 VGA displays expand an already wide range of displays available from the company. The LM4055 and LM4755 models incorporate a white or red LED backlight, while the LM6055 and LM6755 models incorporate a CFL backlight. The LM4755 and LM6755 incorporate an SED 1335 LCD controller for interfacing directly with a microprocessor. All models are available in STN and FSTN modes, and are also available with negative voltage, temperature compensation, and touchscreen options. Outside dimensions of the LM4755 measure 165 mm x 109 mm, while the viewing area measures 122 mm x 92 mm. Wide temperature operation of -20°C to +70°C is also available.
