

Power Strip

This Interpower four position Accessory Power Strip, the 852J2D27, makes it easy for any equipment manufacturer to conveniently supply power to system accessories and peripherals while conforming to electrical standards worldwide. With service to 10 amps at 250 VAC, this new mountable power strip is constructed with four IEC 60320 standard Sheet F outlets, one IEC 60320 C14 inlet, and a single-pole single-throw circuit breaker. This power strip carries UL listing, CSA certification, VDE approval, and the CE marking.
