

Silicone Dispenser

The UltraSaver 1200 air-powered dispensing system makes it easy to apply accurate, consistent amounts of thick room temperature vulcanizer (RTV) silicones without hand fatigue, rework, or cleanup. This economical benchtop unit operates on compressed air and electricity, and uses controlled air pressure to apply RTVs and other thick assembly fluids much faster, easier, and more uniformly than caulking guns, squeeze tubes, and hand syringes. Using air power instead of hand power to dispense thick materials also eliminates awkward squeezing motions that can lead to carpal tunnel syndrome and other repetitive stress injuries.
