

Automation Solutions

Company offers this brochure *Automation Solutions for the Automotive, Machine Tool, Assembly, and Packaging Industries*. The 40-page, color brochure presents a multitude of motion control and positioning systems and components developed specifically for these industries. Products include the award-winning Automation 3200 digital automation platform, linear and rotary stages, servomotors and drives, robots, actuators, and industry-specific motion systems. With over 30 years of motion control and positioning system experience, the company has the knowledge and manufacturing skill to develop solutions for the most demanding applications, including off-the-shelf, custom, and vacuum-prepped products.
