

Hot Runner Nozzles

Gate-Mate Lite offers an economical solution for thin-walled parts, direct part gating, and high-cavitation molding. Available in 10 nozzle lengths from 42 through 130 mm, Gate-Mate Lite is suitable for multi-cavity molds. Featuring an advanced-design square coil heater and integrated thermocouple, the newest addition to the hot runner product line ensures an accurate temperature profile throughout the nozzle. In addition, a highly conductive beryllium copper tip provides the precise heat needed for proper gate control, better part appearance, and minimum vestage.
