

Wire Strippers

The DCF Series Portable Magnet and Enamel Wire Strippers can strip a wide range of wire sizes from 9 to 35 AWG with strip length from 3/32 in to 2 1/2 in. A lightweight hand-piece is driven by a variable speed power unit, which centrifugally controls three carbide stripping blades. There is no time lost to set-up or change blades and wires are quickly stripped. The power is available in 115V, 60Hz, or 220V, 50Hz. The DCF is available in several different models to strip round magnet wires, to strip flat and rectangular magnet wires, to twist wires, and to twist the strands of stranded insulated wires. The DCF Series is also available with an integral dust collector.
