5-Slot Integrated System

Company has broadened its line of AdvancedTCA® products with an expanded offering of 5-slot integrated systems for deployment or development applications. The systems feature a 5-slot full mesh backplane with 2 hub slots, a powerful cooling scheme with a fan controller to support up to 200 W per slot; and optional dual redundant hot swap shelf managers. It is ideal for deployment in NEBS applications such as DSLAMs or other switching applications. The full range of AdvancedTCA capabilities also makes the chassis ideal for system integrators as well as board and software developers. **Schroff**
