

## AC Motor Drive

The SECO's SV3000 AC adjustable speed flux vector drive performs like a DC drive but is equally at home in machines driven by conventional AC drives. Its proven high performance design allows precise control of the speed and torque of an AC induction motor. Its performance surpasses that of most DC drives and approaches that of servo. The rugged and reliable SV3000 is available from 1 to 350 HP, with open loop and closed loop models available.
