

## Fluoroplastic Tubing

This company's Value-Added Services feature a wide array of secondary operations that provide customers with greater design flexibility and simplified purchasing. They include cutting, drilling, punching, chamfering, cuffing, flanging, flaring, etching, marking, slitting, scoring, shrinking, fabricating assemblies with fittings, and custom kitting and packaging. The services can be applied to tubing extruded from materials such as PTFE, PFA, FEP, MFA, THV, ETFE, ECTFE, PVDF, PEEK#153, and PEI Ultem® in smooth, convoluted, corrugated, and co-extruded configurations.
