

## Resistor

The UR73 Current Sensing Chip Resistor offers very low resistance with a range of 30m Ohms to 100m Ohms. It utilizes advanced thick film technology and offers low T.C.R. from  $\pm 100\text{ppm}$  to  $\pm 250\text{ppm}$ , indicative of high precision resistors. The UR73 is available in two sizes  $\#1512\text{A}$  (2.0 x 1.25 mm) and  $2\text{B}$  (3.2 x 1.6 mm), both have a power rating of 0.25W, and are lead free with tolerance of  $\pm 1\%$  and  $\pm 5\%$ . These resistors have an operating temperature range from  $-55^{\circ}\text{C}$  to  $+125^{\circ}\text{C}$ , and are suitable for reflow and flow soldering.
