## **Silicone Tubing (549)**

Silcon® silicone tubing is manufactured for applications requiring pliability, non-toxicity, and temperature resistance. This extremely flexible product is used in various industries including medical, chemical, pharmaceutical, personal care products, and many others, thanks to its diverse features. Silcon's performance characteristics make it a versatile product that may be used in a wide range of applications. The medical, dental, pharmaceutical, and food industries use Silcon because it is odorless, tasteless, and inert, and may be steam sterilized or autoclaved. **NewAge® Industries, Inc.**
