## **Extrusions**

Company offers design assistance with custom profile extrusions to meet the various needs of its customers. It produces profiles to each customer's design and specifications in an array of both rigid and flexible material options. Common extrusion materials include PVC, ABS, ASA, HIPS, TPR, TPE, HDPE, and PP; however, Malish Plastics has the ability to extrude profiles using an unlimited choice of materials. Co-extrusion profiles are available in flexible on rigid, flexible on flexible, color on color, or clear on opaque configurations.
