

Temperature Controllers

These Temperature Controllers feature $\pm 0.1\%$ FS accuracy, sealed front displays with two sets of bright LEDs for process value and set-point, PID control, and accept all popular thermocouples, RTD, and voltage inputs. Designed for intuitive operation, this new line is UL/CUL recognized, CE marked, and includes digital-, programmable-, and limit controllers, and temperature indicators offered in 1/16 to 1/4 DIN sizes.
