

Enclosures

The JB family of enclosures has the right high-tech look for today's high-performance medical electronics. Their JB-55 measures 5.5 in. x 5.25 in. x 1.63 in. and features UL's best flame rating of 94-5VA in black, bone, or gray. Pictured here, this streamlined, contemporary clamshell design is available off-the-shelf and can be completely modified to house medical electronics. The JB's removable end panel offers the perfect opportunity to be replaced with a custom-molded panel to suit individual, highly specialized medical applications.
