

Positioning Table

IDC DS4 Precision Positioning Tables offer precision performance, industrial durability, and maximum configuration flexibility at commercial-grade prices. They feature the unique IDEAL-SEAL[®] system for properly tensioned seal strips, which provides for maximum seal strip life and easy access to the table interior for mounting and maintenance. The IDEAL-SEAL eliminates the need for springs and other small hardware that can be easily lost, and eliminates exposure to the troublesome sharp edges of similar seal strip designs.
