Dispense System (1007)

The EZ-mix®VR Variable Ratio Meter-Mix Dispense System is a piston-based, user-programmable, positive displacement system that provides fully repeatable shots with 0.1 cc accuracy. Featuring Constant-Flow™ technology, which eliminates waiting for the piston pumps to refill with material from the reservoirs, this versatile system can be hooked up to any size reservoir ranging from disposable cartridges to 55-gallon or larger drums.
