

Fiber Cutter

The palm-sized Fiber Cutter is designed exclusively for cutting or stripping plastic optical fiber and flexible light pipe cabling. Molded from ABS plastic, the miniature HandyPro Fiber Cutter[®] measures only 1.75 in. x 1.12 in. and accurately cuts 1.0 mm and 2.0 mm fibers, including native or sheathed fiber, or glass cabling, utilizing an integral stainless steel blade and precision alignment to accurately strip fiber sheathing or cut fibers, fitting comfortably in the palm of the hand.
