

## Chip Inductor

The KL73 1H(0201) chip inductor provides a narrow inductance deviation with a complete range of inductance values, making it an excellent choice for high frequency circuit matching. It is ideal for high volume and small size applications and its compact size allows for high density mounting. The KL73 1H has tolerance available of  $\pm 0.1\text{nH}$ ,  $\pm 0.2\text{nH}$ ,  $\pm 2\%$ ,  $\pm 5\%$ , and an inductance range of  $0.6\text{nH}$  -  $27\text{nH}$  with low DC resistance and high Q. Available in 7 in. paper tape 2.0 mm pitch with 10,000 pieces/reel, the inductors are ideal for use in a variety of industries, including medical.
