

AC Solenoids

The "High-Force" Model 16 family of laminate AC solenoids combines high force and high efficiency in a small package. This solenoid delivers 25% to 50% more pulling power than a conventional AC solenoid in a smaller, lighter package, all at the same power consumption.

• Standard "pull-type" or optional "push-type" configurations

• Dust/moisture protection

• 120 VAC/240 VAC standard
