

Brushless DC Kit Motor

Published on Medical Design Technology (<http://www.mdtmag.com>)

Brushless DC Kit Motor

The 000-0326 high performance brushless DC kit motor is designed for low voltage applications where an efficient, high torque motor is required.

• Operating voltage: 12 volts

• 1 HP of continuous power

• 5.38 in diameter x 2.4 in. length

• Battery operation/typical efficiency: 90%
