

Total Project Management

Expanding its outsourcing capabilities, IBS offers "total project management" to assist customers in managing medical device projects from product inception through delivery for organizations looking for a company to manufacture their products or outsourcing programs. The company offers a full range of services from product design support through molding, assembly, packaging, sterilization, and private labeling. Through its "Automation Program," the company also offers customers the ability to design and build the automated equipment necessary to produce their device and then run that automation within a clean room environment.
