

## Video Microscope

The Hi-Eye® Versatile Video Microscope is ideal for visual inspection and detailed quality control, manufacturing, or assembly work. Hi-Eye is a new generation of video microscope that cost effectively provides more capabilities than simple optical viewers and magnifiers with a user-friendly ergonomic design. The color LCD monitor allows comfortable, direct line-of-sight viewing, eliminating the backaches, headaches, and neck problems common with microscopes, eyepieces, and simple magnifiers. Its large zoom range and generous working distance make it the choice for critical inspection and assembly tasks.
