

## Workstation

The ProCenter combines a comfortable workstation and a powerful dust collector in one compact unit to deliver double the benefits in micro-abrasive blasting technology. Designed for ergonomic comfort, it works with any Comco micro-abrasive blaster and allows an operator to perform precision blasting operations with enhanced visibility. The ProCenter's workstation contains a convenient front-loading door, dual fluorescent lamps, an integral silencer, and an oversized abrade chamber. The dust collector features a full chamber down draft, the latest cartridge filter technology, an automated shaker, and a convenient storage hopper with easy slide gate to make disposal a quick and clean process.
