

Expanded Outsourcing Capabilities

This literature provides an overview of the company's capabilities and services in the contract manufacturing and automated equipment markets. As a complete contract manufacturer of medical devices, IBS can manage the entire outsourcing program from product design support through assembly, packaging, and sterilization. Furthermore, the company can design, build, and run the automated equipment necessary to manufacture a customer's product. Value added services include inventory, distribution, and marketing support. IBS is an ISO-9000 compliant, FDA registered contract manufacturer of class I and II medical devices.
