

Stepper Motors (1419)

Published on Medical Design Technology (<http://www.mdtmag.com>)

Stepper Motors (1419)

The MAE "S Series" hybrid stepper motors are optimized for maximum torque to promote smooth operation. These motors add value with microstepping capabilities ideal for applications requiring fine positioning. They are offered in standard NEMA 23 frame size and three models with step resolutions of 1.8 degrees in full-step mode.

- • Precision-honed stators and ground rotors

- • 4, 6, or 8 leads

- • Single- or double-ended shaft extensions

- • Simple, rugged construction
