

Diaphragm Pump (1583)

Published on Medical Design Technology (<http://www.mdtmag.com>)

Diaphragm Pump (1583)

Suitable for continuous duty use, the SMF 2 pump provides long life, quiet operation, and low power consumption. EPDM valve and diaphragm materials are standard, with others available to meet special application needs. The pumps are self-priming and may safely be run dry. An integrated flow stop function prevents drain-off when the pump is at rest.

• 3.35 in. long

• 6.4 oz.

• Rated fluid flow: 52.5 ml/min

• Maximum pressure: 1.16 psig
