

## Geared Motors

The three-phase BG Series helical geared motors are engineered to drive machines and equipment of all types. The BG Series come as a standard two-stage design and offers simple installation with a wide range of mounting options. These motors include stator winding of high quality insulated enameled copper wire, an aluminum die cast cage rotor, and gear wheels made of high tensile and case-hard steel.

&#149 Power: 0.075 to 50 HP

&#149 Output speeds: 0.3 to 540 RPM

&#149 Torque range: 177 to 163,700 lbf-in.
