

# Paperless Manufacturing System

The InSite Rapid eDHR is an integrated paperless manufacturing system that helps manufacturers improve operations performance, shorten manufacturing cycle times, and reduce the cost of compliance. It automatically constructs electronic device history records by enforcing complete and correct data at every step. It provides real-time feedback and analysis data that facilitate higher first pass yields and quality. Rapid eDHR is quick to deploy and validate, and satisfies the needs of manufacturers looking for a high return on investment.
