## **Diaphragm Solenoid Valve (1703)**

Liquid X is a 12 mm isolated diaphragm solenoid valve that offers the flexibility, reliability, and application-specific performance required by today's medical, bioanalytical, and clinical chemistry OEMs. Designed in collaboration with several global leaders in life science OEM instrumentation, it is the latest offering from the Pneutronics X-Valve technology platform, providing high reliability, low power consumption, and a range of features.

&#149 Perfluoroelastomer and ethylene propylene elastomer options

&#149 Absolute repeatability in response time and performance
