Refrigerated Dryer

The AS-T series rotary screw compressors are available in 20 and 25 hp models. The AS-T series feature integral refrigerated dryers and condensate drains to improve product quality and help reduce wear on production equipment. The units are equipped with the company's "split cooling air flow" design that significantly improves cooling and reduces noise levels. All units feature Sigma Profile aierend and deliver flows from 59 to 112 cfm and pressures from 80 to 217 psig.
