Actuator (1893)

The Type VLA Actuator has fewer components and a lower overall cost by using an LM Guide for its base. Long-term cost savings are also realized through the Type VLA's incorporation of patented Caged Technology, a QZ Lubricator, and electro-mechanical components. This technology (Caged Technology) separates rolling elements with a synthetic resin cage that retains grease, and reduces maintenance costs.

• Replaces pneumatic cylinders

• Slide and cylinder types available

• Compatible with AC or DC servomotor controller packages
