

## Power and Energy Meter

This universal, portable, dual channel power and energy meter is designed for the measurement of lasers and other optical sources. The Universal Meter for Power and Energy (MPE-2500) interfaces to thermopile, pyroelectric, semiconductor, and temperature probes. In conjunction with the meter, the company provides a broad selection of 55 probes operational in a variety of modes. The MPE-2500 features a digital readout, analog bar, and dynamic graphs on a high-resolution backlit LCD screen.
