

MDT Exclusive: Full-Spectrum LED Module

This 1-W single-chip LED module, designated the LK Series, provides up to 60-lumen output for a wide range of uses including medical applications requiring a reliable, high-intensity light source. The 400-mA surface-mount unit uses metal-core PC board assembly and is manufactured lead free in compliance with WEEE and RoHS materials and process specifications. Capable of offering up to 130 percent more color gamut for greater color saturation while providing 40-60 lumen output, it measures 0.8 in. (20.3 mm) in a hexagon pattern. Pricing starts at \$4 each in production quantities.
