

Power Supplies (2175)

These 40 watt triple output power supplies are designed for medical applications. All three models in the series deliver a total of 40 watts of DC power in an open frame configuration, with all medical agency and regulatory approvals completed, including UL2601-1, CE, FCC, and CISPR. The medical power supplies are available on the company's Fast Track program, with 500 unit lots available at OEM pricing in three weeks or less. As with all Fast Track products, these medical models are backed by a five-year warranty. These high efficiency models take wide range input (85-264 VAC) from international sources and supply fully regulated output.
