

## Online Power Supplies Configuration Tool

Excelsys has released the “EXCELerate” online configuration tool. The system is used to configure the power supplies from the company’s offering of 200 to 1,200 W 1U high and 300 to 1,000 W 2.5 in. high modular solutions. These supplies feature user flexibility, high efficiencies, and medical safety approvals. *Information:* [www.excelsys.com](http://www.excelsys.com) [1].
