

## Accessory Power Module

The filtered Sheet F outlet accessory power modules are intended for medical equipment applications where the combination of filtering and AC power entry for detachable Sheet E power cords or cordsets in one component is advantageous. The accessory power module is configured with an IEC 60320-2-2 Sheet F outlet and a filter. It has a maximum rating of 10A international and 15A North American at 250 VAC. The module features include IEC 60320 Sheet F, class I outlet; robust screw mount, nickel plated, shielded enclosure; and 6.35 mm quick disconnect terminals.
