

CPU Module

The PFM-532I is a PC/104 STPC Elite or Consumer II CPU module providing low cost but rich functionality in an entry-level system. The board utilizes a 32-bit 586 STPC Elite or Consumer II onboard CPU with a core frequency up to 133 MHz. It is fanless, with onboard 16 to 32 MB SDRAM and supports DOC (DiskOnChip) and CF (CompactFlash). This model gives end-users a chance to upgrade and further-enhance their system with a lower cost but higher performance module.
