

Power Supplies (2629)

The manufacturer of medical power supplies is converting all the models in its linear power supply line in order to bring the units into full compliance with the RoHS directive. The "International Plus" series linear supplies are available in 115 models encompassing worldwide AC input ranges and safety standards, 7 power levels that range from 3 to 288 W, and regulated outputs that produce very low noise. They are distinguished by rugged design and construction and are available in single and multiple output configurations. Medical models are approved to UL60601-1, EN 60601-1, and CSA 601.1-M90. Medical leakage current does not exceed 10 micro Amps.
