Large Lighted Magnifier

This lightweight, 1.75X magnification magnifier has a working distance of approximately 11 in. and a diameter of nearly 9 in. The aspheric lens provides a clear image across the entire magnified field, with no distortion at the edges. The flexible head swivels 90 degrees for both the vertical and radial axes. This lighted magnifier has a bright white fluorescent bulb that illuminates the entire field. It is supplied with a rotating lens and table clamp or can use a cast iron stand for benchtop mounting.
