

Braid Reinforced Hose

Company recently made improvements in its manufacturing processes and realized increased capacity for its braided hose production lines. Inventories of the company's braid reinforced PVC hose, Nylobrade, and braid reinforced polyurethane hose, Urebrade, have been increased, and custom work's sizes, colors, cut-to-length pieces, heat-formed shapes is welcomed. Nylobrade is clear and produced in twelve stock sizes ranging from 1/8 to 2 in. I.D. with three wall thicknesses thin, standard, and high pressure available. Its ingredients conform to USP Class VI and FDA standards. Naturally transparent, Urebrade is also available in opaque black. It offers uses and sizes similar to Nylobrade.
