

FireWire Cable

This high-flex 1394b firewire 800 cable is offered for the industrial vision systems market. The company developed the product DataCELL MVC-800 to meet the requirements of camera installations in the more demanding factory environments. MVC-800 is a UL-recognized and CSA-approved AWM style cable, with two 26 AWG data pairs insulated with foamed polyethylene and a 22 AWG PVC-insulated power pair, 100% coverage foil/polyester shielding with two drain wires, and an overall tinned copper braid for optimal shielding performance. The outer jacket is flexible oil-resistant PVC and the cable is flame rated to FT-1. Standard color is matte black.
