

Plastics Search Engine (3137)

NPE365 is a powerful new internet search engine that employs the latest technology for two-way, personal searches that filter and produce customized results for the plastics industry. Representing the next generation of Internet search, NPE365 builds off of the SmartBooth and myNPE technology used for SPI's NPE 2006 trade show to match attendees with qualified exhibitors and relevant conference programs. *Information:* www.plasticsindustry.org [1].
