Washable Wireless Keyboard

Featuring SpillSeal patented technology to safeguard against the risk of infection and cross-contamination, this IP66 and NEMA4X certified washable wireless computer keyboard allows for complete up-and-down finger motion that mirrors natural typing, endures repeated disinfecting, and eliminates the need to frequently replace keyboards. The keyboard is compatible with all PCs, including desktops, laptops, workstations, and servers, as well as all healthcare and dental carts and platforms. They carry a full warranty, as well as global supply and support. Additional software is not required.
