

RoHS-Compliant Headers

These 0.079 in. and 0.1 in. board-to-board connectors are 100% RoHS-compliant. Male and female headers are offered in single, double, and quad row configurations, and in both plated through-hole (PTH) and surface mount (SMT) versions. The devices are available with standard (PBT) or high temperature-resistant thermoplastic insulated bodies (PA9T or Nylon 6T) to facilitate conventional SMT reflow or vapor phase soldering processes.
