

## Custom Laser Components

Extensive glass fabrication capabilities and engineering assistance is offered to companies who need laser components produced to their specifications. Using an assortment of mandrels, the company designs and shrinks precision bore tubing in round, capillary, fluted, tapered, rectangular, square, and hexagonal shapes. It maintains an extensive inventory of mandrels, covering the entire range of sizes up to 6.0 in. If the mandrel is not in stock, the company will design the mandrel and perform necessary operations to produce the custom part. These capabilities enable the handling of unique applications.
